DETAILED ACTION

Response to Amendment

1. This action is in response to the amendment mailed April 26, 2006.

Claims 13-15 are pending.

Claim Rejections – 35 USC § 102(b)

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 13-15 are rejected under 35 U.S.C. 102(b) as being anticipated by Richter et al. (U.S. 2,038,679).

Richter discloses a paper made of mercerized wood pulp having no coating applied to it (column 1, lines 20-26, 39-49 and column 2, line 15, 30-35 and 50-55).

Because Richter discloses a paper made of mercerized pulp it is inherent for the paper to be ink jet recording with high ink coloring density and high ink absorption speed along with a liquid transfer length of 100mm or less. The claiming of a new use, new function or unknown property which is inherently present in the prior art does not necessarily make the claim patentable. In re Best, 562 F.2d 1252, 1254, 195 USPQ 430, 433

Art Unit: 1774

(CCPA 1977). Mere recitation of newly-discovered function or property, inherently possessed by things in prior art, does not cause claim drawn to those things to distinguish over prior art. The Patent Office can require applicant to prove that subject matter shown to be in prior art does not possess characteristic relied on where it has reason to believe that functional limitation asserted to be critical for establishing novelty in claimed subject matter may be inherent characteristic of prior art; this burden of proof is applicable to product and process claims reasonably considered as possessing allegedly inherent characteristics.

Response to Arguments

4. Arguments to rejection made under 35 U.S.C. 103(a) as being unpatentable over Kasahara et al. (U.S. 6,165,606) in view of Suenaga et al. (U.S. 6,133,170) have been considered and are moot based on new grounds of rejection.
